

April 1, 2010 Georgia Workers' Compensation Medical Fee Schedule

Materials Supplied by the Health Care Provider

Medical supplies provided by the physician or other medical provider (e.g., sterile trays) over and above those usually included with the office visit (e.g., band-aids and cotton swabs) or other services rendered may be listed separately using CPT code 99070. Medical supplies and durable medical equipment are reimbursed at cost times 1.5 plus \$4.00 for handling charges. Charges greater than \$50 must be accompanied by a copy of the wholesale vendor invoice(s) showing the actual cost of the item. Certain procedures include supplies; therefore, CPT code 99070 would not be reported. Custom-made orthotics/prosthetics and rental equipment are exempt from the supplies and equipment reimbursement formula; however, usual, customary, and reasonable charges will apply.
